SPECIALTIES: TBI TESTING, EEG

TBI EVIDENCE

Personal Injury Worker's Compensation

OAKLEY

5351 Neroly Rd.
Oakley, CA 94561

To schedule, please call:
(925) 306-1884

CONTRA COSTA COUNTY

Mobile TBI Testing
Contra Costa, CA

To schedule, please call:
(925) 306-1884

According to the Brain Injury Society an often overlooked diagnosis in accidental injuries is Mild Traumatic Brain Injury (mTBI). Missing an mTBI diagnosis can lead to a lifetime of emotional struggle, physical and financial turmoil, and even depression and suicide for head injury victims.

According to the Mayo Clinic EEG may also play a role in diagnosing head injury and other brain disorders.

COGNISION® EEG uses FDA cleared Event Related Potential (ERP) and Quantitative EEG (QEEG) technology to examine the functionality of the brain.

EEG has several benefits compared to imaging techniques (imaging shows brain anatomy, not brain function) or pure behavioral observations (counselors and neuropsychologists). EEG-ERP offers inexpensive, immediate (as soon as the day of injury) Frye and Daubert admissible evidence of brain injury, unlike DTI or NeuroQuant where the patient has to wait months for accurate testing due to brain white matter atrophy.

More About This Practice:

Dr. Rick Junnila is highly qualified in spine and extremity trauma, based on his extensive education and years of experience working as a doctor in both the medical and chiropractic fields.

He works with and teaches scholarly presentations in spinal trauma, extremity injury and traumatic brain injuries with numerous highly respected medical doctors, specialists and surgeons regularly.

Dr. Junnila performs testing for TBI (traumatic brain injury / concussion) using EEG-ERP (electroencephalograph event related potential) Cognision technology (www.TBIEvidence.com).
