ABOUT

Instead of drugs or invasive procedures, the Twin Creeks chiropractic care team embraces the power of the body to heal by merging skilled manual therapy (like chiropractic and massage) with the most current technological advances in healing.

They embrace technology and innovation in everything they do. They think of themselves as HIGH TOUCH and HIGH TECH. It is not uncommon to see patients and staff utilizing cold lasers, computer-driven spinal decompression, high-intensity ultrasound, exercise with oxygen therapy, and massage all in the most spectacular office setting in the region.
