PRIME MRI

Personal Injury Worker's Compensation

The Prime MRI team is excited to provide exceptional care and quality treatment for your clients. They hope that you allow them to demonstrate their vast experience of over 12 years in the MRI field. They also primarily specialize in Personal Injury cases.

More about this practice:

- OPEN UNIT MRI available for patient comfort and accessibility
- Operating 7 days a week, including late hours for convenience
- 24-hour turnaround time on reports, bills, and liens for prompt service
- Emphasis on fast booking and quick turnaround to meet urgent needs
- Open to negotiation

Some advantages of an open MRI are as follows:

- Enhanced Comfort: Open MRI machines are designed to reduce the claustrophobic feelings that some patients experience in traditional, closed MRI scanners, offering a more comfortable and less intimidating experience.
- Accommodates Various Body Types: The open design is more accessible for patients of all sizes, including larger individuals, providing a more inclusive imaging option.
- Patient Accessibility: Open MRI is beneficial for patients with mobility issues, allowing easier positioning and access for those in wheelchairs or with conditions that make lying down difficult.
- Flexible Positioning: It facilitates imaging of body parts in positions that may not be possible in a closed MRI, allowing for more accurate diagnosis of certain conditions by observing the area of interest under different conditions.
