ABOUT DR. HOOGENDOORN

Dr. Hoogendoorn has a wealth of knowledge from over 30 years of chiropractic practice. He has experience working with a wide variety of patients from athletes to auto accident cases to chronic pain patients.

He has a cutting-edge practice and is always looking to bring in improvements and new technology by attending classes and symposiums every year. His focus is on optimal function of the musculoskeletal system as well as delivering long term pain relief.

His methods of analysis and treatment are geared to find the underlying cause and treat the patient for lasting pain relief and structural stability. He utilizes a wide variety of techniques in his office and treats patients with muscle and trigger point therapy, physiotherapy (ultrasound, galvanic stimulation, diathermy, and cold laser), all while using full spine and extremity chiropractic manipulations as the cornerstone of his treatments.

Dr. Hoogendoorn has had extensive training with Dr. Ted Carrick of the Carrick Institute, giving Dr. Hoogendoorn a global background in chiropractic neurology. His practice philosophy is to find the problem, fix it and get you back into your normal life as soon as possible.

Let Dr. Hoogendoorn and his caring staff become part of your team for better health.
