ABOUT

At Dr. Kyle Chiropractic Center (DKCC), our goal is to guide each and every patient toward a healthier body, whether that means improving posture and diet or treating the lingering effects of a chronic condition or injury. Our chiropractor customizes every single care regimen, so you will get a one-of-a-kind treatment plan to treat your one-of-a-kind symptoms and lifestyle. If you're living with pain in Santa Rosa, consider a more natural path to pain relief.

DKCC also has local referral contacts for Pain Management, Physical Therapy, and MRI services for timely injury validation. We ensure quick patient scheduling, usually within two days of receiving a referral, and maintain open communication with attorneys about case progress, compliance issues, and referrals. DKCC is committed to delivering detailed chart notes and prompt final paperwork post-treatment, ensuring streamlined case management.
